

PRODUCT INFO

New 1 kg flask

In Scharlab we are aware of the importance of packaging our products with adequate and top-quality packaging to keep the product in optimal conditions. In addition, we offer a wide range of packaging, both in capacity and materials, to adapt to your needs. All of our containers are manufactured following the strictest regulations, trying to be as respectful as possible with the environment.

Since mid-2019, Scharlab chemicals packaged in a 1 kg bottle have a new format. The new package has a modern and more ergonomic design, allowing optimal handling, storage and transport. It is made of high-quality materials and broad chemical compatibility to ensure product stability and maintain its specifications and technical characteristics stable over time.

► The product packaged in the current bottle and the new bottle will continue to be supplied for a while. According to the physical properties of each product it is possible to pack less or greater quantity in this bottle
